

# GODSWILL DANIEL

Full-Stack Developer

[sayhi2godswill@gmail.com](mailto:sayhi2godswill@gmail.com) | [LinkedIn: godswilldan](https://www.linkedin.com/in/godswilldan) | [gwilldan.xyz](https://gwilldan.xyz) | +(234) 906 373 3329

## PROFESSIONAL SUMMARY

---

Results-driven Full-Stack Developer with 5+ years of experience designing and shipping production-grade web and blockchain applications. Proven track record across the full development lifecycle — from concept and MVP to launch — building scalable frontends, robust APIs, microservices architectures, and decentralised systems for clients in fintech, property tech, and Web3.

## SKILLS / TECHNICAL

---

**Languages:** JavaScript / TypeScript, Solidity, Python, SQL, HTML5, CSS3, Excel VBA

**Frameworks & Libraries:** React.js, Next.js, Node.js, Tailwind, Express.js, Nest.js, Ethers.js, Viem, Wagmi, GraphQL, React Query, Zustand, Chart.js, Three.js, GSAP, Motion

**Blockchain & Web3:** Hardhat, Flashbot Bundlers, Indexers, Dune, Smart Contracts (ERC-20, Factory patterns)

**Databases & Infra:** MongoDB, PostgreSQL, Firebase, REST APIs, Docker, AWS, Vercel, Git, WordPress

**Testing & Soft Skills:** Jest | Component Design, Team Leadership, Technical Writing, Resourcefulness

## PROFESSIONAL EXPERIENCE

---

### Acumio

2025 - 2026 | Contract

*Fullstack Developer*

- Collaborated with a team of engineers to design and implement a microservices architecture handling property creation, document preparation, and related workflows.
- Drove the project from concept through MVP to launch, delivering a fully operational conveyancing solution for conveyancers in the UK.
- Built scalable, decoupled services to improve system modularity and long-term platform reliability.

### Aetherforge Labs, Remote

2024 - 2026

*Lead Web3 Fullstack Developer*

Led development of multiple Web3 products — coordinating cross-functional teams, optimising blockchain interactions, and owning end-to-end delivery.

#### Amertis Exchange - On-Chain Liquidity Aggregator

- Led the build of an on-chain liquidity aggregator on Base & Monad; engineered Solidity contracts to fetch the best swap prices across Uniswap, Sushiswap, and Tataswap.
- Built the Next.js frontend with Wagmi/Viem for blockchain interactions, with real-time data indexing for optimised UX.
- Implemented robust testing frameworks to validate smart contract security and performance.

#### Monfundme - Decentralized Crowdfunding Platform

- Spearheaded full-stack delivery of a decentralised crowdfunding platform on Monad — from hackathon concept to functioning MVP, integrating smart contracts, backend, and frontend.
- Designed a first-of-its-kind on-chain user approval mechanism allowing the community to vote on campaign inclusion, making Monfundme fully decentralised.
- Leveraged an indexer to track events from all dynamic factory contracts, enabling real-time data aggregation across the platform.

#### Salesphere - No-Code Token Management Suite

- Led end-to-end development of a no-code platform for token creation, airdrops, and liquidity management; implemented Solidity factory contracts for automated token deployment.
- Delivered an intuitive Next.js frontend enabling non-technical users to deploy and manage tokens effortlessly.

### Blockchain Utility Scripts & Automation

- Built Ethereum rescue bots using Ethers.js & Flashbot Bundlers, recovering 10+ ETH (~\$30,000) from wallets compromised by sweeper bots.
- Engineered NFT minting sniper bots and DEX liquidity sniper bots for real-time ERC-20 sniping on Uniswap (Base & Arbitrum).

## Projexa

2023 – 2024

*Fullstack Developer*

### Projexa-V1 – Task Hub for Designers

- Developed Node.js/Express API endpoints for task assignment and submission management; built interactive UIs that streamlined the designer workflow.
- Implemented a real-time submission and feedback system backed by Firebase for persistent, scalable storage.
- Played a key role in the successful public launch of the Projexa-V1 web application.

## Upnext Firm

2022 – 2023

*Junior Frontend Developer*

### Upnext WebApp – Ticketing and Media Platform

- Built UI components and page routes using WordPress, HTML, CSS, and vanilla JavaScript; ensured pixel-accurate implementation of proposed designs.
- Optimised the front-end for responsiveness and usability, contributing to a smooth booking experience for users.

## EDUCATION

---

### University of Uyo

2015 – 2021

Bachelor of Engineering – Civil Engineering, Uyo, Nigeria

### Royal Technical College

Diploma in Computer Appreciation, Cross River, Nigeria

## AWARDS & RECOGNITIONS

---

- Ranked Top 13 out of 4,000 in Subsquid's Developer Campaign on Coinlist.
- Built a qualifying project in the Monad Hackathon (Monfundme).

## CERTIFICATIONS

---

### Complete DAPP – Solidity & React – Blockchain Developer

March 2022

Udemy / Clarian North, Media Training Worldwide Digital

### Frontend Web Developer

February 2022

Udemy / Zero to Mastery Academy
